

SEPARATIONS SAVVY

ENGINEERED SMARTER. BUILT MODULAR.

We're Not Changing Our Spots

JUST HOW WE TALK ABOUT THEM

While our official name – Koch Modular Process Systems, LLC, remains the same, we're dropping the "KMPS" and focusing on the "Koch Modular". To go along with this, we are introducing a new domain name kochmodular.com. Don't worry, our old website and email addresses will still work during this transition.

You will also start seeing the updated branding on all our documents, website, social media and new email addresses from your colleagues at Koch Modular.

modularprocess.com is now kochmodular.com

OLD	NEW
 <p>KMPS Koch Modular Process Systems, LLC.</p>	 <p>Koch Modular PROCESS SYSTEMS</p>

Our Commitment

Although our brand name and logo are changing, Koch Modular continues to be a highly-skilled, highly technically minded team with a unique blend of single-source capabilities providing a true step-change in process and project delivery. Koch Modular remains committed to supporting the process design and modular construction needs of the Chemical Process Industry.

What's the Koch Modular difference? Listen More. Find a Solution.

Our History

Koch Modular was established through a joint venture with Koch-Glitsch LP, one of the world's most prominent suppliers of mass transfer equipment. Koch-Glitsch's parent company is Koch Industries, one of the largest privately held corporations in the United States. Our modular construction company partners can be found in strategic areas of the US and Canada for worldwide service. Koch Modular regularly invests in R&D, both our own, and on behalf of our clients, through a pilot plant facility located in Houston, Texas.

K-Quips

Name Change? Chemical vs. Physical Change? Spot the number of chemical changes in the list below:

- Food Metabolism
- Iron Rusting
- Metal Electroplating
- Sugar Digestion
- Wood Burning
