

Cost Estimator

Koch Modular is looking for a detailed-oriented individual to join our Sales & Marketing Team. This position is on a contract basis. If you are interested in joining our team, please submit your resume to: careers@kochmodular.com

Essential Duties & Responsibilities:

- Support Sales Team in the development of budgetary and firm price cost estimates for complex chemical process systems including process equipment, instrumentation, process and utility piping systems and structural steel
- Develop, maintain and continuously improve cost estimating tools and templates.
- Customize cost estimating tools and templates to align with project-wide specifications and standards (piping, valves, painting, insulation, piping supports, other miscellaneous specifications)
- Interact with key vendors to obtain current pricing and develop/maintain consistent estimating procedures
- Interact with Project Managers, Piping Designers and other engineering disciplines to develop detailed take off based estimates
- Assist Senior Sales Engineer in training new sales engineers in cost estimating procedures

Qualification Requirements:

- At least 3 to 5 years of experience developing take off based cost estimates for the chemical processing industry
- College degree preferred
- Must be able to read P&ID's, Piping Specifications and General Arrangement drawings
- Strong Microsoft Excel skills required
- Proficient in the use of Microsoft Word. Working knowledge with Bluebeam Revu a plus.
- Requires an energetic, dynamic individual that is a solid communicator; must work well in a team environment
- Must be able to maintain confidentiality, have integrity and be able to meet ethical standards
- Ability to plan and organize is essential, and the ability to think out-of-the-box
